APEX Migration Analysis
for IT Managers, Project Managers & Team Leaders

At a glance

With the PITSS APEX Migration Analysis and the help of PITSS.CON we show you all the automatable, partially automatable and manual processes that are necessary to migrate your Oracle Forms applications to an APEX application.

We provide you with a cost estimate for the entire upgrade process, from the infrastructure, to the project planning and development, all the way to the rollout of the new application. After the analysis, you will have all the parameters required to ensure you are in a position to precisely plan and calculate your project.

Your Situation

You want to replace your Oracle Forms applications with a new, modern and future-proof architecture and have decided on Oracle APEX.

You want to provide your users with a modern look and feel, but still continue using the existing business logic in the database.

However, you are currently unable to accurately estimate the costs associated with this project and are hesitant to take on a migration where it is uncertain how much intensive manual work will be required.

Our Analyses

Status Quo Analysis

Quality Analysis

Development Analysis

Upgrade Analysis

ADF Migration Analysis

APEX Migration Analysis

The Analysis Will Help You

■ *Prepare an APEX migration project plan*

■ *Determine APEX migration costs*

■ *Determine the time required for an APEX migrationn*

What We Offer
The PITSS ADF Migration Analysis includes:

1. Preparation (Remote or Onsite)
- Delivery of the application to be migrated and documentation of all the information required for a holistic approach to the migration

2. Analysis (Offsite)
- LadLoading and parsing of the source code
- Processing of the objects in the PITSS.CON Repository
- Identification of all the objects relevant for the migration and preparation of the metrics
- Preparation of a project plan with a phase model
- Infrastructure consulting (DB + web server)
- Preparation of the evaluation for the presentation and documentation

3. Presentation (Onsite)
- Evaluation and preparation of the results
- Summary and presentation of the possible migration
- Presentation of the Forms2APEX Assistant

Duration: Results within a week
Prerequisites: Status Quo Analysis

What you get:

- *Cost evaluation*
- *Project planning*
- *Recommendations*

ORACLE® Gold Partner
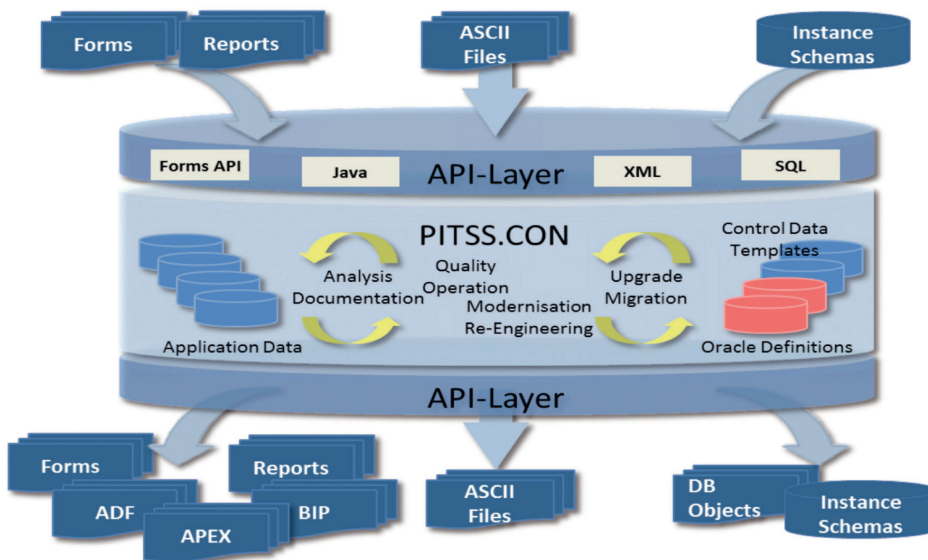

Our Tool-Supported Method

We load your application in the repository-based analysis tool PITSS.CON with the unique functionality of the module PITSS.CON Source Code Analytics (SA). In a parsing process, all the objects in your application and their dependencies are identified and made available for analysis.

Since PITSS.CON inspects the entire source code (forms, reports, libraries, database objects, scripts, etc.), the algorithms provide a very detailed insight into the structure, scope and complexity of the application.

PITSS.CON Repository

■ *Unique technology for the administration of every object and function of an Oracle applicationng*

■ *Data and figures for success ful Oracle project decision*

PITSS.CON Repository: The documented results of this analysis enable us to show you the optimization potential.

With the PITSS.CON Repository, Oracle Forms and Reports applications of any size and complexity can be managed, developed and re-engineered. The heart of PITSS.CON is an innovative, unique Oracle-based repository that is able to understand and manipulate applications at the finest granular level. At the same time, 100% consistency and adherence to standards for the processed applications are ensured.

The PITSS.CON Technology Base is the underlying base technology for the entire PITSS.CON development platform that opens the way for a wide range of functions for the entire lifecycle management of Oracle applications.

ORACLE® Gold Partner

www.pitss.com

PITSS is the leading provider of software & services for modernizing and effectively managing Oracle applications. With over 1,000 customers and a multitude of successful Oracle projects PITSS has gained international recognition.

PITSS.CON

The high performance software solution PITSS.CON has been convincing for years in all areas and phases of Oracle Forms projects through a high level of automation, speed, efficiency and reliability. The module PITSS.CON Source Code Analytics supplies decision-relevant project results already in the starting phase.

PITSS SERVICES

PITSS Services successfully supports its customers in Oracle IT projects with a customised Full Service Offer in the form of consulting, training, development, administration & support. The focus is on Oracle themes, Oracle databases and Fusion Middleware such as: Forms & Reports, SOA, WebLogic Server, Single Sign-on (SSO), Java, ADF, APEX, upgrade, migration, reengineering and web development. PITSS Services demonstrates the best expertise, well-founded knowledge of applications, high project experience and a strong and targeted project management. PITSS Services advisors are Oracle (OCP) certified.
